X-Frame enclosure

A flexible mount for the widest possible range of tablets

The SafeGuard X-Frame is a lightweight, easy to handle, low profile solution that keeps the essential buzz of using a tablet whilst offering a secure mount with a range of options depending upon the requirements of the application.

X-Frame broadens the overall scope of the use of tablets, and delivers a solution to service all customer tablet requirements with this highly flexible and discreet design. It combines Ergonomic Solutions' traditional retail focus and knowledge with a new aesthetic design to meet the growing demands and use of tablet technology.

With so many variations on applications and types of device, mounting options are more diverse than ever, requiring flexibility and style whilst ensuring security. X-Frame is the ideal solution for the most comprehensive range of Android™, iOS™ and Windows® based tablets.

Such is the flexibility of the design; we are able to produce a new X-Frame within 10 days of receiving any new 10" tablet brought to market, should we not already have a solution available.

We understand technology and technology integration and we also understand the physical security requirements of these valuable assets. Tablets are high value and highly sought after. Our ClickSafe® security tethers are available for applications requiring hand-held or mobile operation.

A simple, lightweight and secure mounting solution for any tablet

	DTFF301	SpacePole floor stand with DuraTilt Flip

SafeGuard UCS

Make sure your tablet is charged and safe with the Universal Intelligent Charging and Storage Solution for tablets and USB devices. The design and function of SafeGuard UCS is targeted primarily at intelligent tablet charging and storage with or without protective casings such as the X-Frame.

It's important to make sure that any device being charged within the UCS unit will charge at the manufacturers recommended level, replicating what takes place when plugging your smart phone or tablet into the manufacturers own wall charger. The charging unit at the heart of our UCS solution will emulate the manufacturers charging profile and avoid potential battery life loss from over or under charging.

The SafeGuard UCS is available in three cabinet variants to cover a comprehensive range of use cases, with either charge or charge and sync capability.

Ergonomic Solutions

Celebrating its twentieth anniversary, this year, Ergonomic Solutions has grown rapidly to become a global leader in the design, manufacture and supply of the most ergonomically advanced mounting and security solutions for a wide range of static and mobile technology hardware.

Years of deep understanding of the evolution of point of service technology hardware ensures that the latest generation of Ergonomic Solutions mounting solutions leverage technology to provide a combination of best practice in customer experience, and demonstrable return on investment in a wide range of applications. Creators of SpacePole, Ergonomic Solutions is the global market leader, having supplied over 5 million unique SpacePole installations – and in the retail sector we supply over 60% of the global top 50 retailers, making our technology mounting solutions the preferred choice.
