

PAD-2AMT

2-in-1 Adjustable Monitor and Tablet USB Hub

2-in-1 Adjustable Monitor and Tablet USB Hub

This versatile dual arm mount combines a generous set of joints and pivot points with a sturdy aluminum build to make both your tablet and monitor cornerstones of your digital workspace. The perfect addition to a classroom, conference room, or doctor's office, this remarkable twin arm mount installs easily to a desk, countertop, or table, using either the adjustable scratch-protected C-clamp or the included grommet mounting system. Customize your setup, with 360-degree rotating pivot points at both the arm bases and at the flexible, gas spring elbow joints. Both holders attach to the end of the arm at another tilting joint and rotate 360 degrees for portrait and landscape orientations. The adjustable tablet holder grips your tablet by the corners, while the unique monitor holder tightly grips from the top and bottom. At the base of the mount are 2 USB extension ports and 2 USB extension cables for easy charging while in use. Just plug the attached USB cables into a computer or other power source, then plug your tablet directly into the base of the stand.

Features:

- Sturdy aluminum construction
- Gas spring, angle-adjustable arms with flexible elbow joints
- 360-degree rotation points at arm bases and elbow joints
- Tablet holder tilts at two axes and rotates 360 degrees for portrait and landscape orientations
