LED STAKING SYSTEM FOR RENTAL

LED STRUCTURE FOR RENTAL MARKET

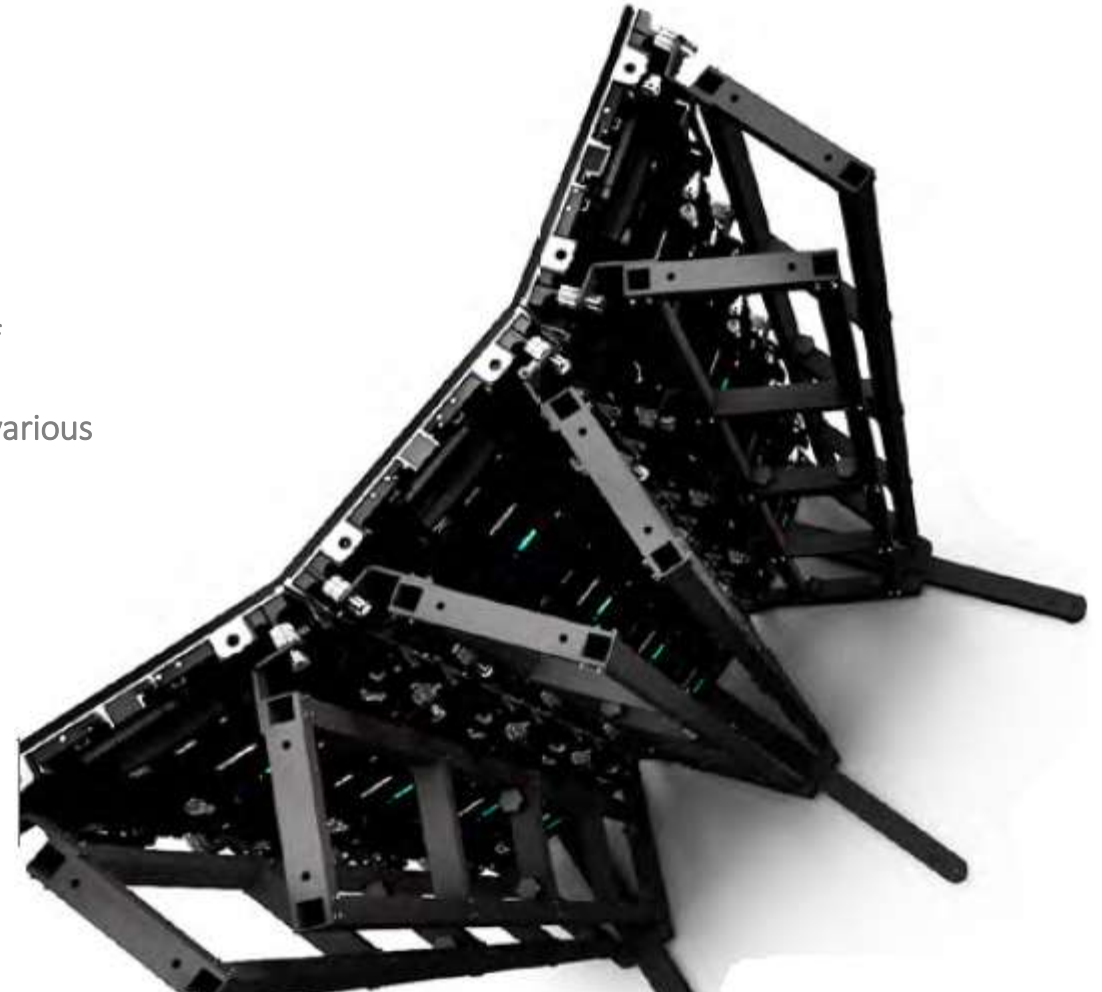

Indoor / Outdoor installation solution

Main features

Entirely built in Aluminum

- Lightweight
- Easy to carry and install
- It can be customized to fit different panels
- Entirely designed and manufactured in Italy

Unique in its field, ensured to perform any type of installation, including curved, concave and convex configurations up to 5m in height, with angles of various degrees between each panel.

TOURING CARTS

Entirely made in aluminium, the touring carts allow the LED Stacker components to be transported quickly and easily.

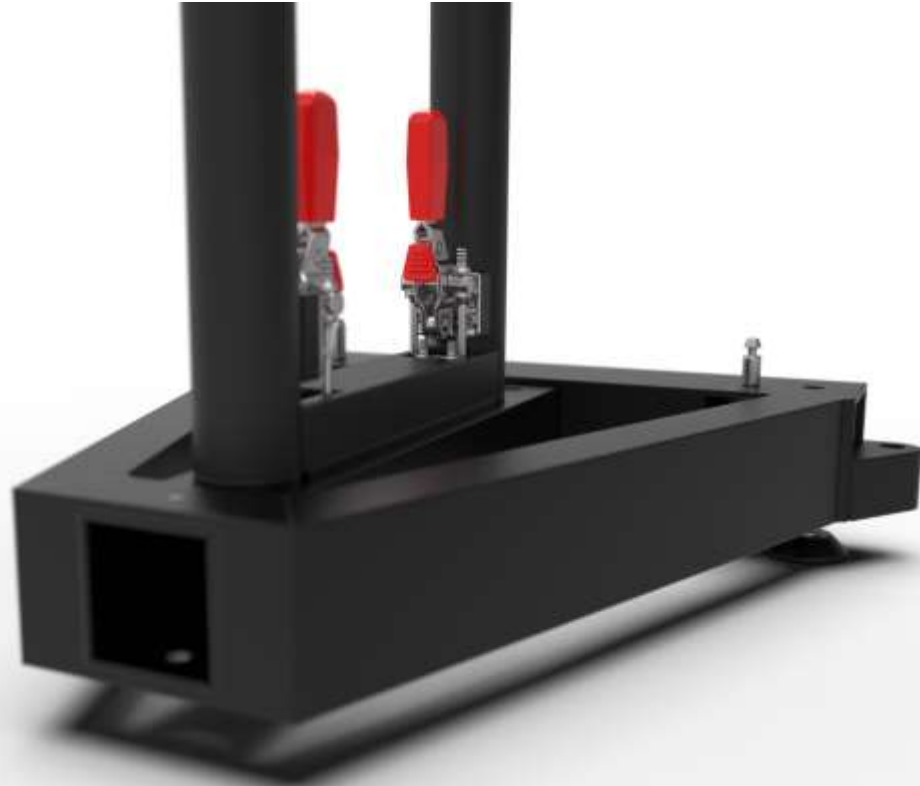

The modular design allows the carts to be collapsed into small stacks, which can easily be put away after the set-up and stored until load-out.

Flexible, light, easy to transport and assemble
